

POLYURETHANE MAGNETIC LINERS

AEG Polyurethane Magnetic liners are made from high quality resilient cast polyurethane.

They provide excellent resistance to abrasive and impact wear in raw material handling. The self-indicating layer (1/3 yellow, 2/3 blue) provides preventative maintenance capabilities.

Due to the flexibility of these liners, they can be installed on slightly curved surfaces.

Benefits

- Superior ABRASIVE wear resistance due to polymer material
- Weight (6x lighter than steel)
- Superior IMPACT resistance and resilience
- Superior SLIDING co-efficiency
- Ease of handling & installation
- No permits required
- No tools required
- Flexibility
- Noise reduction
- No corrosion

Specifications:

610mm x 305mm

16mm thick
