

POLYURETHANE SHEET LINER

Dimensions

Thickness : 10, 16, 20, 25, 30

(Thickness includes 2-3mm epoxy/glass fibre)

Standard Sheet Size : 2400 x 1200mm

Custom size : 1200 x 1200mm

600 x 1200mm

Fastening methods

Drilled holes through steel bin structure and liner and fixed with counter-sunk hexagonal cap-screw bolts and Nylock nuts.

Bolts fastened until bolt heads are pulled into the polyurethane to below the wear surface and in contact with backing plate.

Materials

90 Shore A

Exceptions

Polyurethane liners are limited to cold dry and cold wet materials handling and should not be applied in conditions where the temperature continuously exceeds 80°C or wet steam at 60°C.
